## MESSAGE FROM CHAIRMAN

This year, we have worked hard to streamline consolidate our e-solution package of support as part of our vision for a realistic future for our children. We want to see the poor and marginalized being taught technologically so that they do not become obsolete, we are intent on equipping our future generations with the skills and confidence to meet the challenges of the modern world because we have a global outlook for our children. Our schools in Baluchistan are flourishing and we are planning our roll out nationally to achieve this vision and goal. I am proud of the dedicated staffs that continually look for ways to move us forward and achieve our aims. With the cooperation of our kind supporters, stakeholders, and communities, we will continue to provide the best services skills and development impetus to the children we educate. We must also focus on going girls into schools as recent data indicates only 24% are literate; this must be addressed as when you educate women you are educating the entire family, and probably entire generations.
